从 Richard Stallman 得不到打印机驱动程序源代码说起...

From: torvalds@klaava.Helsinki.FI (Linus Benedict Torvalds)
Newsgroups: comp.os.minix Subject: What would you like to see most in minix? Summary: small poll for my new operating system
Date: 25 Aug 91 20:57:08 GMT

Hello everybody out there using minix -

I' m doing a (free) operating system (just a hobby, won' t be big and professional like gnu) for 386(486) AT clones. This has been brewing since April, and is starting to get ready. I' d like any feedback on things people like/dislike in minix, as my OS resembles it somewhat (same physical layout of the file-system (due to practical reasons) among other things).

I' ve currently ported bash(1.08) and gcc(1.40), and things seem to work. This implies that I' ll get something practical within a few months, and I' d like to know what features most people would want. Any suggestions are welcome, but I won' t promise I' ll implement them :-)

Linus (torvalds@kruuna.helsinki.fi)

GNU powered it...

GPL protect it...

God blessing it...
